starlight

BRAND & DESIGN SYSTEM GUIDE · 2026

Starlight Brand Guide.

The technical reference for the Starlight brand — colors, typography, spacing, components, and copy patterns. A single source of truth for anyone building with the Starlight identity.

CONTENTS

The system, section by section.

01 **Brand principles** 03
What Starlight sounds like and what it doesn't.

02 **Logo & mark** 04
The primary mark and wordmark on light and dark surfaces.

03 **Color — core** 05
The four brand colors and their role.

04 **Color — scales** 06
Blue and neutral ramps (50–900).

05 **Color — semantic** 07
Backgrounds, foregrounds, borders, states.

06 **Typography — families** 08
Manrope, Poppins, JetBrains Mono.

07 **Typography — scale** 09
From display to caption, with specs.

08 **Spacing, radius & shadow** 10
The 4-based spacing scale and surface tokens.

09 **Components — atoms** 11
Buttons, pills, eyebrows, links.

10 **Components — surfaces** 12
Cards, feature tiles, pricing, terminal.

11 **Iconography** 13
Line icons — weight, fill, tinting.

12 **Voice & copy**
How Starlight writes. Do / don't examples. 14

01 · BRAND PRINCIPLES

Technical confidence, without the swagger.

Starlight is infrastructure software for serious workloads. The brand should sound like the kind of platform engineers trust with production: calm, precise, and quietly confident. Four principles shape how it looks and reads.

01 Precision over polish.

Every word, color, and spacing choice is deliberate. Avoid decoration for its own sake — if a line, bullet, or gradient doesn't add clarity, remove it.

02 Plain language, not jargon.

Write the way an engineer talks about systems they've actually shipped. No "synergies," no "solutions," no "platforms for the AI era." Name things by what they do.

03 Dark-first, lit with blue.

The default surface is deep neutral (`#06080B`), with `#0047BB` Starlight blue used as the single accent. Gradients and auroras are atmospheric — never content.

04 Systematic, not bespoke.

Components compose from tokens. A new page should be 80% tokens and 20% judgment. If you find yourself eyeballing a spacing or color value, promote it to a token.

02 · LOGO & MARK

The mark & wordmark.

The Starlight star sits alongside the wordmark. Use the white variant on dark surfaces and the black variant on light. Maintain clear space equal to the width of the star on all sides.

starlight

wordmark · on dark

starlight

wordmark · on light

mark · on dark

mark · on light

USAGE

DO

Place on the deepest neutral or a neutral light surface. Keep the mark a single color — never gradient-fill or outline it.

DON'T

Don't rotate, skew, recolor, or place on photography without a sufficient backdrop. No drop shadows on the mark.

03 · COLOR — CORE

Four brand colors.

The Starlight identity is built on four tokens. Starlight blue is the only true accent; everything else is neutral. Blue appears sparingly — on primary CTAs, accents in data viz, and the aurora backdrop.

Starlight Blue
#0047BB
--starlight-blue

Starlight Black
#212020
--starlight-black

Starlight Grey
#BFBFBF
--starlight-grey

Starlight White
#FFFFFF
--starlight-white

04 · COLOR — SCALES

Blue & neutral ramps.

Derived scales fill in between the core tokens. Blue 500 is the brand anchor; neutrals run from pure white to a near-black used for the default page surface.

BLUE · 50 → 900

Blue 50 #EAF0FC	Blue 100 #C7D6F5	Blue 200 #8FACEB	Blue 300 #5782E0	Blue 400 #2862D3
Blue 500 · brand #0047BB	Blue 600 #003A99	Blue 700 #002D77	Blue 800 #001F55	Blue 900 #00112E

NEUTRAL · 0 → 950

Neutral 0 #FFFFFF	Neutral 50 #F5F6F8	Neutral 100 #E7E9ED	Neutral 200 #C9CCD3	Neutral 300 #9DA1AB
Neutral 400 #6B6F79	Neutral 500 #4A4D55	Neutral 600 #2F3238	Neutral 700 #1E2025	Neutral 800 #15171B

Neutral 900
#0B0D12

Neutral 950 · page
#06080B

05 · COLOR — SEMANTIC

Semantic tokens.

Components reference semantic tokens, not raw hex values. Promote any value used more than once.

SURFACES

--bg-0

06 · TYPOGRAPHY — FAMILIES

Three families.

Manrope carries display and UI. Poppins sets body copy. JetBrains Mono runs terminals and code. All three are served from Google Fonts.

Manrope

DISPLAY · 400 / 500 / 600 / 700 / 800

Geometric sans with a technical feel. All headlines, eyebrows, UI labels, and buttons. Tight tracking on display sizes (-0.03 to -0.04em).

Aa

Poppins

BODY · 300 / 400 / 500 / 600 / 700

Humanist sans for body copy and long-form reading. Normal tracking, 1.5 line height by default.

Aa

JetBrains Mono

MONOSPACE · 400 / 500 / 600

For terminals, code blocks, metadata, and technical captions. Preserves visual rhythm with proportional text.

Aa

07 · TYPOGRAPHY — SCALE

Display to caption.

The scale is tight at the top (display, H1, H2) and opens up through body. Sizes live in `colors_and_type.css` as `--fs-*` tokens.

DISPLAY
Manrope 800
60 / 0.95 · -0.04em

Edge-Native.

H1
Manrope 700
48 / 1.05 · -0.035em

One platform. Every workload.

H2
Manrope 700
36 / 1.05 · -0.03em

Security is part of the architecture.

H3
Manrope 700
26 / 1.1 · -0.025em

Unified by design.

LEDE
Poppins 400
17 / 1.5

Starlight runs VMs, containers, and AI on one platform — engineered for the edge.

BODY
Poppins 400
14 / 1.55

Shared identity, shared policy, shared lifecycle — VMs, containers, and AI are first-class peers on the same platform, with one set of primitives.

08 · SPACING, RADIUS, SHADOW

Surface tokens.

Spacing is 4-based from 4px → 128px. Radius runs small to fully round. Shadows come in three roles: raised, popover, and glow.

SPACING · 4-BASED

--sp-1	4px
--sp-2	8px
--sp-3	12px
--sp-4	16px
--sp-5	24px
--sp-6	32px
--sp-7	48px
--sp-8	64px
--sp-9	96px
--sp-10	128px

RADIUS

--r-sm
Small · 6px
chips, small inputs

--r-md
Medium · 10px
terminal, inputs

--r-lg
Large · 16px
cards, surfaces

--r-xl
XL · 24px

GRADIENT EMPHASIS

On a modern platform.

linear-gradient(#6B91E8 → #0047BB) · text clip

10 · COMPONENTS — SURFACES

Cards & containers.

Each surface uses the same recipe: elevated neutral, 1px hairline border, 16–24px radius, and a subtle hover state in product.

FEATURE CARD

UNIFIED

VMs, containers, AI — one control plane.

Shared identity, policy, and lifecycle across every workload type. No separate stacks to glue together.

EDGE-FIRST

Operates without central coordination.

Nodes keep running when the WAN drops. First-class HA without a three-node cluster.

TERMINAL

```
$ starlight run vm win-server-2022 --cpu 8 --mem 32G
$ starlight run container ghcr.io/acme/api:v42
$ starlight run model llama-3.1-8b --accel gpu

# one API — VMs, containers, and AI on the same node
✓ node online · 3 workloads scheduled
```

11 · ICONOGRAPHY

Line icons.

Starlight icons are 72 × 72 line drawings with 1.64px strokes and rounded caps. Recolor via `currentColor` or a light-blue hue-rotate filter against dark backgrounds.

12 · VOICE & COPY

How Starlight writes.

Short sentences. Concrete nouns. State the mechanism, not the mystique. When in doubt, delete the adjective.

DO / DON'T

DO

Run VMs, containers, and AI on one platform.

DON'T

Unlock the next generation of hybrid edge-cloud AI-native synergy.

DO

Nodes keep running when the WAN drops.

DON'T

Our cloud-first fabric delivers resilient connectivity outcomes.

DO

Models are delivered as OCI container images.

DON'T

Leverage AI-ready infrastructure to supercharge your models.
